

Пројектни задатак за домаћи рад

Јавни тестови

У наставку су дати улази и очекивани излази који представљају јавне тестове пројектног задатка. Да би пројектни задатак био прегледан, програм мора да изврши све јавне тестове без грешака. Програм који има грешку у јавним тестовима биће одбачен без даљег прегледања.

Улаз	Очекивани излаз
\$ echo "Hello World!"	Hello World!
\$ echo input.txt	A C++ program is a sequence of text files (typically header and source files) that contain declarations. They undergo translation to become an executable program, which is executed when the C++ implementation calls its main function.
\$ echo Hello World! How are you? EOF	Hello World! How are you?
\$ echo <hello.txt >out.txt \$ echo <hello.txt >>out.txt	(sadržaj fajla out.txt) Hello World!Hello World!
\$ prompt "?" ? prompt "#"	
\$ time	19:20:45 (format vremena sme da se razlikuje)
\$ date	12.12.2025. (format datuma sme da se razlikuje)
\$ touch tout.txt \$ touch tout.txt	Greška! Fajl već postoji! (ispis greške sme da se razlikuje)
\$ echo <hello.txt >empty.txt \$ truncate empty.txt	(sadržaj fajla empty.txt je prazan)

<pre>\$ touch temp.txt \$ rm temp.txt</pre>	(direktorijum ne sadrži fajl temp.txt)
<pre>\$ wc -w input.txt</pre>	36
<pre>\$ wc -c Hello World! How are you? EOF</pre>	26
<pre>\$ wc -w Hello World! How are you? EOF</pre>	5
<pre>\$ tr -" " Hello World! How are you? EOF</pre>	HelloWorld! Howareyou?
<pre>\$ tr input.txt -"execut" "E"</pre>	A C++ program is a sequence of text files (typically header and source files) that contain declarations. They undergo translation to become an Eable program, which is Eed when the C++ implementation calls its main function.
<pre>\$ head -n1 Hello World! How are you? EOF</pre>	Hello World!
<pre>\$ batch basic_commands.txt</pre>	(sadržaj fajla test.txt) time: 19:20:45 (format vremena sme da se razlikuje)

<pre>\$ batch red_commands.txt >batch.out</pre>	<pre>(sadržaj fajla batch.out) Done (sadržaj fajla redirect_test.txt) time: 19:20:45 (format vremena sme da se razlikuje)</pre>
<pre>\$ batch cmd_commands.txt Hello World! How are you? EOF</pre>	<pre>Hello World! How are you?</pre>
<pre>\$ echo "I love programming in C!" tr -"C" "C++" wc -c</pre>	<pre>26</pre>
<pre>\$ batch all.txt Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF Hello World! How are you? EOF #</pre>	<pre>(standardni izlaz) Hello World! A C++ program is a sequence of text files (typically header and source files) that contain declarations. They undergo translation to become an executable program, which is executed when the C++ implementation calls its main function. Hello World! How are you? 19:20:45 12.12.2025. Greška! Fajl već postoji! 36 26 5 HelloWorld! Howareyou? A C++ program is a sequence of text files (typically header and source files) that contain declarations. They undergo translation to become</pre>
